Forest Preserve District
OF WILL COUNTY
Bringing People and Nature Together

Project Fact Sheet

Hammel Woods Wetland Mitigation Area
Management and Monitoring (2014-2015)

Hammel Woods wetland mitigation and buffer area is comprised of 5.7 acres. As part of the recently constructed Hammel Woods and Grinton Grove – DuPage River Trail improvements, on site wetland mitigation was required under the U.S. Army Corps of Engineers (ACOE) permit. This wetland was constructed and one year of management and monitoring was conducted during 2013. Five years of management and monitoring are required under the ACOE permit. This contract will provide management and reporting in years two and three (2014-2015).

The Hammel Woods Wetland Mitigation management and monitoring project will include weed management, native plant and seed enhancement, prescribed burning and annual monitoring reports.

Notice of the proposed improvement dates will be provided on the District's website, *ReconnectWithNature.org*.

Project Schedule:

- January 2014 – Bid Letting
- February 2014 - Bid Opening
- March 2014 - Award of Contract
- March 2014-December 2015 – Project Implementation

Project Cost: $60,000.00 (Capital Improvement Program)

Project Contractor: To be determined
