

Find a safe place away from street and house lights where you can sit or lay down and gaze at the night sky.

Be sure there are no trees blocking your view!

## Night Sky Activity Sheet

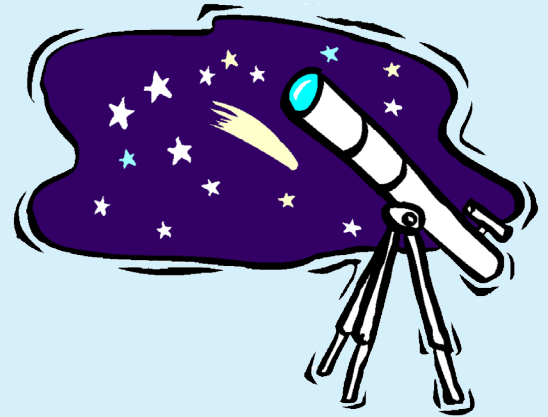

Look at up at the night sky. List the things you see:

---

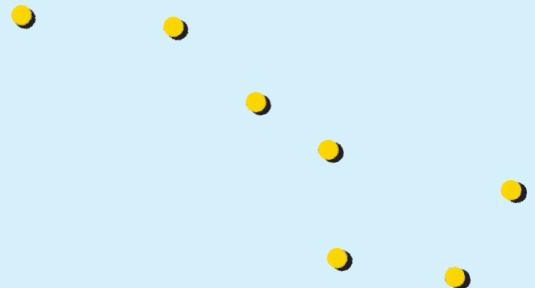

---

---

If you saw the moon, draw its shape here:

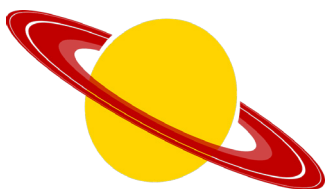

Connect the dots to form the Big Dipper.  
Now look up in the sky to see if you can find it.

Can you find a "star" moving across the sky very quickly that only lasts for a few seconds?  
That is a meteor, also called a shooting star!

Can you find a "star" moving across the sky very slowly but faster than the others?  
Those are man-made satellites!
